Subject: SSVEC rate increase to pay for cost of solar power for individuals

Mr. Stump, Mr. Forese, Mr. Little, Ms. Bitter Smith, and Mr. Burns,

This past week SSVEC placed an article in the Sierra Vista Herald about their rate increase to take place soon. They attributed the rate increase to the cost of those in the area that have individual solar power.

So if I have the facts correct, the state of Arizona, the utility, and the Federal Government subsidized (which all are no longer available after this year) people to put in individual solar systems. Now, in order to pay for the added cost of those systems, the Arizona Corporation Commission has approved a SSVEC rate increase to pay for that cost. Are these facts correct?

If so, I STRONGLY object to subsidizing someone who has chosen to put in solar power. Those additional costs should be born by those who put the systems in. ENOUGH IS ENOUGH.

Either continue to subsidize all individuals in the entire state to be on individual solar power or not, but do not penalize through added costs those that have come to the game too late or chose not to participate. What is fair and equitable about this? This is such an injustice that I hope you rethink your actions. Mr. Blair from SSVEC has explained to me that Mr Stump was not in favor of this rate approach. So why did the rest of you support this? There is no LOGIC to this approach. Those that want solar power now have lower electrical usage for an approach where installation was subsidized and now those that do not have it get to pay for their lower bills. STOP the robbery now. This should be illegal.

This is nuts. I welcome any and all facts showing the potential errors of my statements above.

Subject: roof top solar means energy independence

Dear Chairman Bitter Smith,

I am an American, an Arizonan, and a veteran, and I vote. I want you to stop SSVEC and all other corporations, co-ops from punishing their customers who installed roof top solar. We should encourage people to install roof top solar not penalize them.

Roof top solar means energy independence for citizens, cities, our state, and our great nation.

We should not pay more because we choose independence and freedom.

Please oppose SSVEC's proposal. Don't waste customer money and resources on a hearing to tax solar customers, particularly with a rate case in the near future. They should review all rates, including solar rates, in a rate case.

Sincerely,

Kenneth Davis

Subject: SSVEC

Dear Chairman Bitter Smith,

I am shocked and saddened at the aggressively nasty position that my cooperative, SSVEC, has taken against me and other cooperative members in regard to solar.

As you are presented with a one-sided view of their financial state, please include this one little SSVEC's customer's points of view into your review.

Please consider the fact that SSVEC has pulled a "sort of" bait and switch game on some of its members. They aggressively provided incentives, created special programs, charged extra fees, and encouraged any and all members of this cooperative to install solar and other forms of energy-saving devices in order to help the cooperative and ALL members from having to buy so much power. Now, they are looking at their bottom line and squealing that WE solar users have taken unfair advantage of them and their other members. I just don't get it.

They have chosen to focus, negatively, on just rooftop solar users. What about all of those members who have been encouraged and have purchased energy efficient light bulbs, fixtures, heat pumps, etc. In effect, they are also "avoiding" buying the cooperatives' power by doing this.

Thank you for your time and consideration.

Sincerely,

Shirley Gilbert

Subject: All of your customers deserve solar choice./ SSVEC customer 85635

Dear Chairman Bitter Smith,

Solar power is good for Arizona, and provides homeowners a choice in how they power their homes. Your customers deserve that choice.

SSVEC has launched an attack on energy freedom by proposing unfair taxes on homes that produce their own power through rooftop solar outside of the proper procedure of a rate case. SSVEC is planning to sneak in a special hearing to tax solar customers despite the fact they are planning a rate case in the very near future.

Please oppose SSVEC's proposal. Don't waste customer money and resources on a hearing to tax solar customers, particularly with a rate case in the near future. They should review all rates, including solar rates, in a rate case.

Sincerely,

Rich Brownell

Subject: w all rates, including solar rates, in a rate case.

Dear Chairman Bitter Smith,

All Americans deserve the ability to power their own homes, and get fair credit for the energy they produce. SSVEC has launched an attack on individual choice and property rights by proposing high taxes on homes that produce their own power, and they've launched this attack outside of the proper procedure of a rate case.

SSVEC is trying to ram through a discriminatory solar hearing despite the fact they are planning a rate case in the very near future. Please don't let SSVEC waste customer money and resources. They should review all rates, including solar rates, in a rate case.

Sincerely,

John Dobson

Dear Chairman Bitter Smith,

I am an APS customer who has solar panels on my home in Scottsdale. The decision to go solar was based largely on my wish to reduce greenhouse gas into the atmosphere but at a reasonably affordable price.

The costs of installing solar, WITH government incentives, promises to be less expensive than not doing solar, but I truly won't know for sure until the end is reached on the 20 year lease and I'll know if the panels produce as expected. When I was deciding I told myself that installing solar created manufacturing and installation jobs that couldn't be outsourced to foreign countries and those jobs were good for the economy. In addition, I firmly believe that Arizona should be the leader of the country when it comes to producing clean solar energy. Please encourage individuals to install rooftop solar so that we need fewer fossil fuels producing old-technology energy when a green alternative is becoming viable.

Your customers deserve that choice.

Dear Chairman Bitter Smith,

Solar power is good for Arizona, and provides homeowners a choice in how they power their homes. Your customers deserve that choice.

SSVEC has launched an attack on energy freedom by proposing unfair taxes on homes that produce their own power through rooftop solar outside of the proper procedure of a rate case. SSVEC is planning to sneak in a special hearing to tax solar customers despite the fact they are planning a rate case in the very near future.

Please oppose SSVEC's proposal. Don't waste customer money and resources on a hearing to tax solar customers, particularly with a rate case in the near future. They should review all rates, including solar rates, in a rate case.

Sincerely,

Brent Nilson

In the same vein, APS will only withdraw a similar proposal if the Arizona Corporation Commission (ACC) considers a study to be conducted that solely examines the costs of rooftop solar, not including its benefits. This would be fair only if all the costs of using fossil fuels is included in the analysis of energy production from fossil fuels. This would include health and climate modification costs which may be difficult to pinpoint but which are certainly not insignificant.

Sincerely,

Robert Mac Nish

Subject: All of your customers deserve solar choice.

Dear Commissioner,

Solar power is good for Arizona, and provides homeowners a choice in how they power their homes. Your customers deserve that choice.

SSVEC has launched an attack on energy freedom by proposing unfair taxes on homes that produce their own power through rooftop solar outside of the proper procedure of a rate case. SSVEC is planning to sneak in a special hearing to tax solar customers despite the fact they are planning a rate case in the very near future.

Please oppose SSVEC's proposal. Don't waste customer money and resources on a hearing to tax solar customers, particularly with a rate case in the near future. They should review all rates, including solar rates, in a rate case.

Sincerely,

Karen Sartain

Dear Chairman Bitter Smith,

All Americans deserve the ability to power their own homes, and get fair credit for the energy they produce. SSVEC has launched an attack on individual choice and property rights by proposing high taxes on homes that produce their own power, and they've launched this attack outside of the proper procedure of a rate case.

SSVEC is trying to ram through a discriminatory solar hearing despite the fact they are planning a rate case in the very near future. Please don't let SSVEC waste customer money and resources. They should review all rates, including solar rates, in a rate case.

I think you are not representing the best way to do this.

You're going to tax the sun? It's like having to buy air to inflate a tire. These things are given to us by the Lord. Don't forget, you will have to account for the sins you have.

Sincerely,

Robert Hankey

Dear Chairman Bitter Smith,

When asked by APS to help them achieve 15% Solar by 2015 by installing Solar on my house. I didn't know that they were going to later on try to raise my rates because I was not paying the same as people who don't have solar. Is that the thanks i get for helping them achieve their goal. Maybe if they paid for my Solar, but I paid 100% of it. They don't give me the same rate they get for the electricity that I put on the grid. Maybe you should consider that first before giving in to their wants. Think of the other people that helped you get your position on the Board, the voters that wanted somebody to look at the consumers needs.

Thank you
Lynn Withem

With all that said my personal opinion is this is stupid if people pay extra bog money just to buy solar stuff and try to be more resourceful of our planet they should do the same. Meaning they should buy alot of that this way energy comes cheap to them and they can still disperse it out. Its not our fault people make these things available for us to go buy to lower bills if they have a big problem with it then its not the consumer they need to charge but the distributor

Dear Chairman Bitter Smith,

All Americans deserve the ability to power their own homes, and get fair credit for the energy they produce. We chose solar to 1) do our part to use our natural resource, the sun, to reduce our footprint from the utility grid and 2) to help increase the value of our home over others without solar and 3) to reduce our overall utilities costs.

The penalties being imposed are bad enough, but even worse is losing our freedom of choice and freedom to find ways to live in this world that helps the environment, reduces our footprint, utilizes our natural resources well and reduces our costs so that we can be more economically strong.

Subject: SSVEC should review all rates, including solar rates, in a rate case.

Dear Chairman Bitter Smith,

All Americans deserve the ability to power their own homes, and get fair credit for the energy they produce. SSVEC has launched an attack on individual choice and property rights by proposing high taxes on homes that produce their own power, and they've launched this attack outside of the proper procedure of a rate case.

SSVEC is trying to ram through a discriminatory solar hearing despite the fact they are planning a rate case in the very near future. Please don't let SSVEC waste customer money and resources. They should review all rates, including solar rates, in a rate case.

Sincerely,

Larry Watkins

Subject: SSVEC should review all rates, including solar rates, in a rate case.

Dear Commissioner,

All Americans deserve the ability to power their own homes, and get fair credit for the energy they produce. SSVEC has launched an attack on individual choice and property rights by proposing high taxes on homes that produce their own power, and they've launched this attack outside of the proper procedure of a rate case.

SSVEC is trying to ram through a discriminatory solar hearing despite the fact they are planning a rate case in the very near future. Please don't let SSVEC waste customer money and resources. They should review all rates, including solar rates, in a rate case.

Sincerely,

Vittorio Tedesco Zammarano

Dear Commissionser,

Solar power is good for Arizona, and provides homeowners a choice in how they power their homes. Your customers deserve that choice.

SSVEC has launched an attack on energy freedom by proposing unfair taxes on homes that produce their own power through rooftop solar outside of the proper procedure of a rate case. SSVEC is planning to sneak in a special hearing to tax solar customers despite the fact they are planning a rate case in the very near future.

Please oppose SSVEC's proposal. Don't waste customer money and resources on a hearing to tax solar customers, particularly with a rate case in the near future. They should review all rates, including solar rates, in a rate case.

Sincerely,

jared gillespie

Subject: SSVEC rate increase to pay for cost of solar power for individuals

Mr. Stump, Mr. Forese, Mr. Little, Ms. Bitter Smith, and Mr. Burns,

This past week SSVEC placed an article in the Sierra Vista Herald about their rate increase to take place soon. They attributed the rate increase to the cost of those in the area that have individual solar power.

So if I have the facts correct, the state of Arizona, the utility, and the Federal Government subsidized (which all are no longer available after this year) people to put in individual solar systems. Now, in order to pay for the added cost of those systems, the Arizona Corporation Commission has approved a SSVEC rate increase to pay for that cost. Are these facts correct?

If so, I STRONGLY object to subsidizing someone who has chosen to put in solar power. Those additional costs should be born by those who put the systems in. ENOUGH IS ENOUGH.

Either continue to subsidize all individuals in the entire state to be on individual solar power or not, but do not penalize through added costs those that have come to the game too late or chose not to participate. What is fair and equitable about this? This is such an injustice that I hope you rethink your actions. Mr. Blair from SSVEC has explained to me that Mr Stump was not in favor of this rate approach. So why did the rest of you support this? There is no LOGIC to this approach. Those that want solar power now have lower electrical usage for an approach where installation was subsidized and now those that do not have it get to pay for their lower bills. STOP the robbery now. This should be illegal.

This is nuts. I welcome any and all facts showing the potential errors of my statements above.
